

## **CALL FOR PROPOSALS: COURSE DEVELOPMENT IN SCIENCE AND SOCIETY**

**ELIGIBILITY: ALL CORE LECTURERS AND TENURED OR TENURE-TRACK FACULTY AT COLUMBIA UNIVERSITY (INCLUDING BARNARD)**

**AMOUNT OF AWARD: \$3,000**

The Columbia University Center for Science and Society invites proposals for the development of new undergraduate curricular offerings in the study of science and society. The aim is to introduce courses that can be offered within current disciplinary structures, as part of already-existing majors and concentrations, but that bring significant discussion of science and society into these offerings. This is the third round of grants, and information on the courses funded in the first rounds can be found at <http://scienceandsociety.columbia.edu/courses/course-development/>.

The competition is open to Core Lecturers and tenured or tenure-track faculty at Columbia University (including Barnard) in any discipline. Successful applicants will receive a \$3,000 research allowance to be used for the development and teaching of the course over the following two years. If the course is to be co-taught, the instructors will split the award. Tenured faculty must use the entire award to support research for the course (e.g. book purchases or photocopying) and to hire a student to provide research and/or teaching assistance. Funds will be transferred to the awardee's accounts in his/her home department. Awardees will commit to teaching the course within two years of the start of the grant. The Center for Science and Society will help to publicize the courses and will feature them on its website.

In order to apply, please complete the following form and submit it, along with a one-page proposal and a full CV for each instructor, to Deborah Coen, Director of Research Clusters and Curriculum, The Center for Science and Society, [dcoen@barnard.edu](mailto:dcoen@barnard.edu).

Deadline: **May 6, 2016**. Proposals will be judged by a multi-disciplinary panel drawn from the steering committee of the Center for Science and Society.

## Course Development in Science and Society 2016 Application Form

Last name:                      First name:                      Email:                      Phone:

Academic position:                      Department:                      Subfield(s):

Proposed Course Title:                      Semester to be offered (e.g. Fall, 2015):

ONE-PARAGRAPH COURSE DESCRIPTION SUITABLE FOR THE COURSE BULLETIN.  
INCLUDE ANY PREREQUISITES.

RATIONALE FOR PROPOSED COURSE IN TERMS OF ITS ROLE IN THE DEVELOPMENT OF  
THE STUDY OF SCIENCE AND SOCIETY AT COLUMBIA.

INSTRUCTOR'S PAST AND CURRENT COURSES TAUGHT AT COLUMBIA.

PLEASE ATTACH A ONE-PAGE COURSE DESCRIPTION THAT INCLUDES:

- main topics and the sequence in which they will be covered
- course objectives, specifying specific skills students will gain
- examples of assigned readings and other course materials
- description of assignments on which student assessment will be based
