

7th ANNUAL ALLIANCE GRADUATE SUMMER SCHOOL

Research Methods in Sustainable Development
with applications to urban planning, networks, and public policy

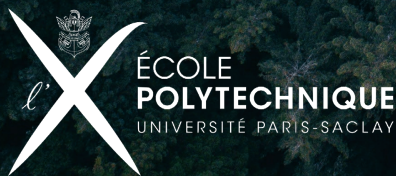

PARIS, FRANCE || 28 MAY – 1 JUNE 2018

The Alliance network is pleased to announce its seventh annual summer school for research methods in sustainable development. This weeklong program is geared toward graduate students in economics, environmental science, public policy, and related fields. It will feature:

- Presentations from world-class professors, researchers, and policymakers
- Workshops for participants to apply analytical tools including Google Earth Engine and statistical analysis software
- Applications to urban planning, social and economic network analysis, and machine learning and big data for international development and climate policy

TO APPLY

- Applications are open to research-based masters and PhD students
- Participation fee: 80€ (covers all lunches and refreshments)
- Deadline: 1 April 2018
- Contact us at sdev.summerschool@gmail.com or visit <http://bit.ly/sdev2018>
